

Answering Machine Short Manual

Recording and playing back a greeting/information text

A default greeting and a default information message are stored. You can customise the texts.

Example: Text for primary internal number

     1 = Greeting text
 2 = Information text

Select  Lift handset
 Confirm with  Recording starts
 Record text
 End recording
 Play back recording

Press      to record and play back the text for the secondary internal number.

Switching the answering machine on and off

 AM Activation function key

 1 = AB off
 2 = AB on - greeting text
 3 = AM on - information text

Select

Without function key:      - primary internal number,      - secondary internal number

Viewing and listening to messages on your ST 30 AM

Mail key flashing - new message. Mail key lit steadily - old message already checked

   Call list Answering machine
Select  Confirm selection

  Example AM: Smith AM AM Memo Smith
Select  Confirm selection

If there is only one call list or message for the answering machine, the "Select" option is not required; the call list or message for the AM is immediately displayed.

Functions during playback

You can enter commands to control the answering machine during playback.

-  Listen to next message
-  Listen to previous message or repeat current message from beginning
-  Listen to all the messages on the answering machine one after another
-  The playback volume through the loudspeaker can be temporarily adjusted using the arrow keys  
-  "2": Temporary playback at double speed, "1": Normal playback
-  Clear displayed message
-  Clear all the messages from an answering machine
-  End playback/display
-  The external or internal number shown on the display is dialled

Recording a memo

You can utilise your ST 30 AM as an acoustic notepad, such as to log phone conversations and to record memos or other verbal notes.

Recording a phone conversation (Logging)
